PROSPECTUS.

THE BOMBAY ICE MANUFACTURING COMPANY, LIMITED.

CAPITAL Rs. 1,25,000 IN 1,250 SHARES OF Rs. 100 EACH, TO BE PAID IN FULL ON ALLOTMENT.

Directors.

J. A. FORBES, Esq. — CUMROODEEN TYABJEE, Esq.
A. W. FORDE, Esq., C.E., — RUGHOONATH NARAYEN
J. GORDON, Esq. — BYRAMJEE KHOTE, Esq.
NANABHOY JEEJEEBHOY, Esq.

Agents.

Messrs. F. RBES & Co.

THIS Company is established for the purpose of providing a constant supply of pure transparent block Ice at a price that will bring it within the means of a very large portion of the inhabitants, who at the prices now charged cannot afford to use it except as a luxury.

Arrangements have been made with the General Ice Factory Company, Limited, of London and Manchester, to provide machinery (Siddeley and Company's Patents) capable of producing ten tons of Ice in every 24 hours. The machinery is similar to that now in use in Manchester, where 30 tons of Ice are produced daily in blocks 4 feet by 3 feet 6 inches, and 12 inches thick. The Ice made is of better than any imported Ice can be, and at Manchester it has driven the Norwegian Ice entirely out of the market.

A full description of the process may be seen in *Engineering* of the 22nd June 1877, and this has greater value from being an independent report.

Further evidence of the perfection of the machinery and its admitted success lies in the fact that M. Lesseps has arranged with the London Company for machines for the whole of France on terms similar to those offered to this Company. Their operations have also extended to San Francisco, where machinery capable of making 10 tons daily is being prepared. In other parts of America, and in the immediate neighbourhood of the Ice Supply, Associations being formed to make Ice by this patent machinery.

Numerous other instances could be brought forward to shew the position this Ice Machinery holds in public opinion, and the confidence that is reposed in it based on the success of the patent machinery in Galle, Cawnpore, and other places, showing that it works equally well in those places as in Manchester.

The General Ice Factory Company, Limited, undertake to erect this *Factory* and guarantee the thorough efficiency of the machinery for three months, charging the Association Rs. 1,04,341, which they estimate to be the actual cost, with 10 per cent. added for their expenses, management, and erecting and starting the Factory. The Company will also be prepared to uphold the same, if required, for such period of years as may be arranged, at an annual premium of 5 per cent. on the cost.

The machinery for making ten tons of Ice daily consists of two sets for making 5 tons each. All the connections of steam and exhaust are such that in the event of any emergency either one or the other engine can be worked alone, or either one by high pressure only, or either as a condensing engine. Every part of the pumping power arrangements is thus so duplicated that, in the event of any partial breakdown, the work may be continued by the other portion of the engine without a moment's stoppage.

Advices received by last mail mention that one of the 5-ton machines will be ready for shipment in a few weeks.

The nett profits arising from the carrying on of the business are to be divided as follows:—10 per cent. preference dividend as a first charge to be paid to the Members of the Bombay Ice Manufacturing Company Limited, and then one-half of the profits beyond 10 per cent. The other half of the surplus to be paid to the London Company for their patent rights, royalties &c.

The confidence of the London Company, of which Lord Claude Hamilton is Chairman, in so grave a risk as the success that appears above, they waive all right to any payment for patent rights and royalties until the local investors have received 10 per cent. on their capital, and from calculations that have been made of the cost of production here checked by men of large local experience, it is evident, that if the Ice be sold at half an anna per lb., the profits over and above 10 per cent will be very large indeed.

The General Ice Factory Company, London, take one-fifth of the capital, or 250 shares, representing Rs. 25,000.

The remaining 1,000 shares are now offered to the public. Applications for shares should be addressed to Messrs. Forbes & Co., from whom printed forms can be obtained.

BOURNE AND SHEPHERD, PHOTOGRA

COMMERCIAL INTELLIGENCE

SATURDAY EVENING, 18TH MAY 1878.

ANOTHER week has passed without apparently bringing a settlement of the Russian difficulty any nearer, although the advices from Home continue pacific in tone, and the various markets now show little apprehension of war. The more cheerful aspect of matters at Home does not, however, produce any corresponding effect here. Cotton is stronger, but supplies are too small to admit of an extended business, and the same may be said of Seeds and Wheat, which, moreover are naturally depressed by the more pacific views prevailing. Freights are in a most stagnant state, to-day's quotations for Liverpool being 15s. to 20s. by Steam, and 20s. per ton by sailing vessels, and even at these ruinously low rates there is not cargo for a third of the tonnage in harbour and likely to arrive before monsoon. Imports of all kinds are proportionately as dull, Money is plentiful and difficult to employ even at 3 per cent., and altogether the state of business is such as might be expected during the rains, but not in May which we have been accustomed to have, one of the busiest months of the year. The fact is, however, that after two years of short crops and famine, the country does not contain the basis of active trade, either in imports or exports, and it will take more than one good season to restore things to their normal state, whilst it is difficult to imagine what the effect of another bad year might be.

MONEY.—The Bank of Bombay return for the week ending on 11th inst. was decidedly favourable, the Cash Balance showing an increase of 11¼ lacs notwithstanding an increase of 6¼ lacs in loans and discounts and withdrawls of 17 lacs of Government Money. It was generally supposed that this would lead to a further reduction in the rates of discount at the usual weekly board meeting, but they are still maintained at 6 per cent. on fixed and 7 per cent. on demand loans. These figures, however, are purely nominal, as in the open market loans against Government Paper are easily negotiable at 3 per cent. per anum. The Bank of Bengal in Calcutta reduced their rates of discount one per cent. on Thursday last, making their minimum 4 per cent. per annum, and this, with an increased export trade in prospect, is significant of the state of the market there. As a general rule the demand for Money in Calcutta has generally helped to steady our market somewhat during the monsoon, but both sides are now tending in the same direction, and with the existing depression in trade, we may look for very low rates for Money so soon as the season comes to an end.

EXCHANGE.—We have had a quiet week in Sterling with only a limited business doing, and rates throughout have had an easier tendency. The opening quotations for this steamer on Tuesday were 1s. 8¾d. for demand Bank and 1s. 8¾d. for 3 months Credit Bills, but on Wednesday a marked downward tendency was apparent, and rates for Bank Paper were reduced 1-16d. On Thursday a similar decline took place in Private Bills, followed on Friday by a further drop of 1-16d. all round, since when there has been no change, closing rates being :—Bank Bills on demand 1s. 8⅝d. ; 6 months sight 1s. 8¾d. ; Credits, 3 months' sight 1s. 8 11-16d. ; 6 months 1s. 8¾d. ; Documents, 3 months' sight 1s. 8¾d., ; 6 months 1s. 8 13-16d. per rupee. Bills are negotiable at the figure for delivery up to the end of June, and there seems no anticipation of any important movement. Not at all events while Council drafts are maintained at their present level of 40 lacs per week, which is evidently fully equal to trade requirements. The last allotments went at about 1s. 8¾d. per rupee, and so long as they obtain this rate Government are not likely to reduce them, knowing as they do that they will have the slack season to face, during which it may be their policy to suspend the drawings altogether for a time.

Bar Silver in London remains steadily at 53½d. per oz., equivalent to about 1s. 8¾d. per rupee, but the price ruling here in the bazaar for trade purposes gives considerably better than the Mint outturn, and small shipments for this side are still going on, last Southampton steamer bringing £60,000.

On Calcutta the rate for demand drafts is 1/16 per cent. premium and for 60 days' sight ⅜ per cent. discount.

On China the quotation for 60 days' sight MEXICANTILE Bills is Rs. 225 per 100 dollars.

From Hongkong the latest quotation for 6 months' sight Bank Bills on London is 3s. 11⅞ to ¼ per dollar and from Shanghai 5s. 6¾d. per tael.

GOVERNMENT SECURITIES.—The market opened with a weaker feeling, and for a few days there were more sellers than buyers, and Fours touched Rs. 94. The decidedly pacific character of the later news from Home, however, coupled with the rapid rise in Consols, has imported renewed confidence, and at the close a very firm feeling prevails. We quote Fours and Fours-and-a-half, Rs. 94½ to ¾ ; Fives-and-a-half, Rs. 103¾.

SHARES.—The market has been fairly active this week and a considerable business has been done at varying rates, but mostly tending in favour of holders. In *Bank* shares a steady feeling prevails. Bank of Bombay have fluctuated slightly, but close at the previous rate of 40 per cent. premium. Nationals are firm at an advance of Re. 1, Agras are Rs. 4 lower. *Land* Companies are dull owing to the announcement made by Government that the offers already made for the foreshore properties are final. Colabas have declined Rs. 25, Prems and Mazagons are unaltered. *Press* Companies are firmer, and we notice an advance of Rs. 50 in Albert Co., of Kurrachee. Rs. 40 in Scinde and Punjaub, Rs. 35 in Apollo, Rs. 30 in Scinde Press and Rs. 2 in Broach Cotton Co. Mofussil Co. are Rs. 2½, Colaba Press Rs. 50 per share lower. *Spinning and Weaving* Co's. have been somewhat irregular, but as a rule show an upward tendency, although why it is difficult to say. There is certainly no improvement in the position of the industry : on the contrary, a number of the mills must be steadily working to a loss. We notice an advance of Rs. 85 in Sassoon, Rs. 50 in Sholapore, Rs. 45 in Dhurrumsey, Rs. 30 in Alfred Mills, Rs. 25 in Nasoneal, and 20 in Nicol Manufacturing Company, Rs. 10 in Central India and Mazagon, and Rs. 5 in Colaba. Khandesh Spinning Co.'s shares have fallen Rs. 395, owing to the destruction of the Company's premises by fire at Julgaum, and there is further a decline of Rs. 100 in Hydrabad, Rs. 25 in Oriental ex-div., Rs. 15 in Jewraz Balloo, Rs. 10 in Hindustan, and Morarjee Goculdas, and Rs. 5 per share in Bombay Hemp and Jute, Great Eastern and Nursey. Amongst *Miscellaneous Company's* Treacher and Co., Limited, have risen Rs. 25 and Bombay Burmah Trading Company Rs. 20 per share.

PIECE GOODS.—There is no new feature to report in the position of the market either present or prospective ; the demand continues on the same limited scale, the clearances for the week being only estimated at 300 packages from first hands and 1,500 packages from the bazaar ; prices remain unaltered, and supplies, as a general rule, ahead of current requirements.

Grey Shirtings of all widths are in large supply, and although values are nominally the same, sales to any extent can only be effected at a reduction from current quotations. Jacconets and Mulls meet a moderate demand at former figures, but Printers, Madapollams, and T. Cloths have been very sparingly dealt in, while Longcloths and Domestics continue as before almost unsaleable.

Bleached Goods have been more difficult of sale, and with the exception of Lappets, which are in fair request, the clearances have been most limited. Dyed and Printed Goods, as also Turkey Reds remain quite stagnant. Of Local Made Cloths sales have been restricted to about 300 packages, although in some cases lower prices have been taken.

TWIST.—The off-take shows no signs of improvement, and as in Goods importers do not look for any increase of activity until after the monsoon. Stocks are not excessive for an ordinary season, but with the small demand we have to meet they are sufficient, both in English and Local Yarns, to depress the market.

METALS.—*Copper* is quiet with but a limited demand, and the business done shows a decline of As. 4 per cwt. In *Yellow Metal* an equally quiet feeling prevails, and we reduce our quotations As. 4 to As. 8 per cwt. In *Iron* there is no movement in prices to notice, and the market may be called dull, with large stocks of most descriptions.

COALS, owing to the continued pacific character of the Home advices, are very dull ; in fact, as regards business in arrivals, quite stagnant, no transactions having been reported for the past fortnight. On the bunder a cargo of Davison's West Hartley has changed hands at Rs. 21 per ton. Cardiff on the spot is scarce, and meets a ready retail sale at comparitively high rates, Rs. 30 per ton delivered on board steamer having been paid. Stocks here are not heavy, but the quantity afloat to arrive here before the opening of next season is large.

COTTON.—The Liverpool telegrams have reported a more active market throughout, and this, combined with the firmness due to short supplies, has induced an advance in prices of Re. 3 to Re. 4 per candy. The purchases during the week sum up a total of about 12,000 bales consisting of about 7,000 bales Comrawattee, 2,000 bales Dhollera, 1,500 bales Compta, 500 bales Veraval, 500 bales Ginned Broach, 300 bales Ginned Dharwar, and 200 bales Westerns and Tinnivelly.

Of *Omras* the supplies continue liberal considering the lateness of the season, and the yield of this description is proving to be the largest ever known. In fact but for this, the Cotton season would now have been almost at an end, as *Dholleras*, of which shipments mostly consist at this period of the season, are quite an insignificant crop in quantity and most inferior in quality. *Comptas* are not coming in freely as yet nor can they be expected until after the monsoon, and *Dharwar* is also kept back by the difficulty of finding transit to the coast. Owing to last season's famine, bullocks are almost unobtainable, and the receipts of this growth before the monsoon will be much smaller than was expected.

The *Receipts* from the districts during the week ending on Saturday were 29,826 bales against 33,584 bales last week and 51,990 bales for the corresponding week last year. The total since 1st September last is now 753,330 bales against 940,450 bales for the corresponding period of last season.

The *Clearances for Sea* since the departure of last Mail have been 14,142, bales, making a total of 483,354 bales since 1st January, against 594,834 bales last year. We are thus 111,480 bales behind last season up to date, all lost within the past three weeks, and it is problematical therefore whether the total for the six months ending 30th June will top 600,000 bales.

The following are to-day's quotations for Cotton with equivalents in Sterling Cost and Freight to Liverpool, via Canal, without Commission :—

SEEDS.—*Linseed*, although not in very active request, is supported in price by the short supplies, especially of good qualities, whilst the decline in freights and exchange have also a tendency to advance rupee prices. We now quote ready, Rs. 6-8½ to Rs. 6-10 per cwt. *Rapeseed* is in a somewhat similar position, and the better qualities of Guzerat are As. 1 per cwt. higher, say Rs. 7-7 to Rs. 7-8 per cwt.

WHEAT is scarcely being dealt in for export, the stock of suitable qualities being very small. Nominal prices are :—Best White, Rs. 39 to Rs. 40 ; Mixed, Rs. 36 to Rs. 38 ; Red, Rs. 35 to Rs. 37 per candy.

COMPLIMENTARY ORDER ON THE RETIREMENT OF COLONEL GORDON, C. I. E.

Head Quarters, Simla, May 13.

Colonel W Gordon, C I E, has relinquished the post of Assistant Adjutant General for Musketry, on nomination to a Brigade command.

The Commander-in-Chief in India desires to acknowledge the important services rendered by Colonel Gordon to the British and Native Armies in India, during the period he discharged the duties of Chief Inspector of Musketry. During the fifteen years in which this officer supervised musketry instruction, breech-loading arms of precision replaced muzzle-loaders.

The returns of the British Army establish the progress of musketry in India, and the very high relative position of battalions trained in this country, together with the marked successful developement of musketry education in the Native Army, testify to the excellence of a system for which the Army is principally indebted to the continued and arduous exertions of Colonel Gordon ; and for which the thanks of His Excellency the Commander-in-Chief are justly due.

MONDAY, MAY 20, 1878.

How much longer Russia is to be allowed to abuse the patience of England, no one can say. The English Ministry seems to be incapable of forming a virile resolution, or it would have declared war long ago unless Russia consented to give plain proofs of the sincerity of her expressed desire for peace by abandoning the attempt to carry out the provisions of the Treaty of San Stefano. We wish to speak with all respect of the opinions of correspondents who have, within the last few days, rebuked us for saying that we could see no possible peaceful issue to the negotiations ; but it seems to us that they give us opinions and nothing more. They rely on articles in the German papers professing to show the financial exhaustion of Russia, or on ridiculous statements that, owing to the ravages of war and disease, the Russian army has almost ceased to exist except on paper, and they have consequently come to the conclusion that Russia will be compelled to humiliate herself before England and accept peace with dishonour rather than try the chances of an appeal to arms. There is plenty of this sort of talk among Englishmen at home, but it only betrays the overweening self-confidence of a purse-pround nation. The best military authorities reckon the Russian forces south of the Danube as numbering from 250,000 to 300,000 soldiers, who are inured to war and ready to fight cheerfully to death for the Czar if only he keeps them supplied with plenty of ammunition and a little black bread. The Russian troops from the frontier of Bessarabia to Constantinople occupy the most fertile corn-growing districts of Eastern Europe, and can live in great part at the expense of the unfortunate inhabitants. They occupy all the strong places in the country except Shumla and Varna, and for the last four months they have been incessantly occupied in strengthening their military position by bringing up immense supplies of stores of all kinds and a vast number of heavy guns which may be employed in the siege of the Turkish capital or the defence of the passage of the Bosphorus against the British fleet. They are now commanded by the greatest of Russian Generals, who has deliberately withdrawn his troops from those positions on the coast of the Sea of Marmora where they might be exposed to the fire of the English ironclads, and has concentrated them further inland, on the high ground immediately to the north of Constantinople, where they eagerly await the order to advance to the northern shore of the Bosphorus. It is true that, simultaneously with these continued preparations for war, the Russians have gone on preaching peace ; but they have been perfectly consistent in rejecting every proposal, no matter by whom preferred, which tended to interfere in any way with the claims asserted by them in the Treaty of San Stefano. No one can point to a single concession that they have made, even at the instance of Prince Bismarck. It was reported the other day that they were willing to abandon Batoum,—and this would have been a real concession,—but the report was evidently unfounded. It is much more probable that General Todleben, seeing the time has now come for action, has addressed an *ultimatum* to the Porte, demanding

AMENDMENT TO LORD HARTINGTON'S MOTION.

LONDON, MAY 17.

In the House of Commons this evening, Sir Michael Hicks-Beach, Colonial Secretary, announced that he would bring forward an amendment to Lord Hartington's motion, "that the control of Parliament over the employment of the Military forces of the Empire is fully secured by the right vested in Parliament to refuse supplies, and that it was inexpedient to pass a resolution which would weaken the hands of the Government at this juncture."

CONTINUED RUSSIAN ADVANCE ON CONSTANTINOPLE.

LONDON, MAY 18.

Notwithstanding the pacific tone of the news lately received from St. Petersburg, the Russians still continue massing their troops nearer to Constantinople and the Bosphorus.

The Russians are advancing on Gumalwina, which is situated near to Gallipoli.

STATEMENT BY THE "DAILY NEWS."

The *Daily News* states that General Todleben has sent an *ultimatum* to the Porte demanding the evacuation of Shumla, Varna, and Batoum, or the Russians will occupy Boyukdere.

SERIOUS RIOT AT PRESTON.

A serious riot, attended with much violence, has taken place among the strikers at Preston and Great Harwood, in which the military eventually had to interfere, and succeeded in dispersing the rioters without having to use their arms.

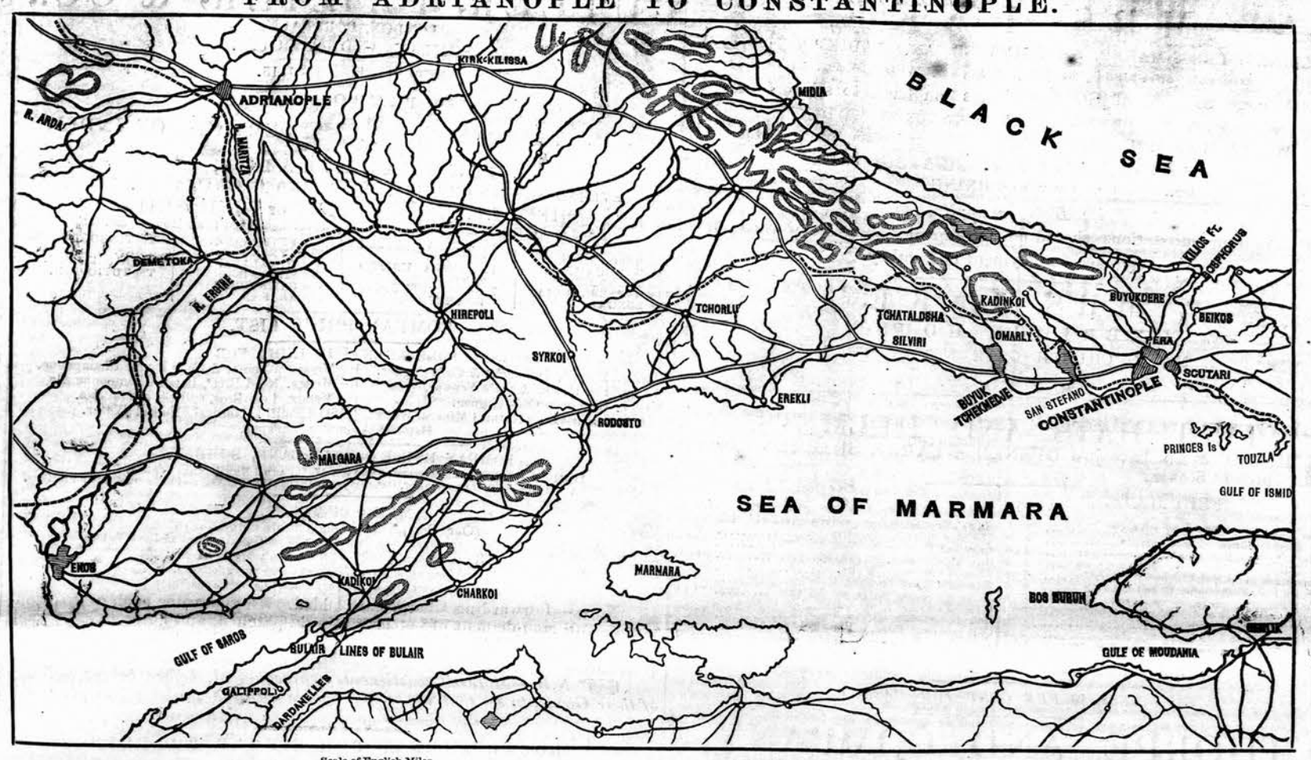
MESSAGE FROM HER MAJESTY THE QUEEN TO THE VICEROY.

His Excellency the Viceroy has received from Her Majesty the Queen a telegram conveying her great satisfaction at the loyal and spontaneous offers of troops which have been made by many Princes and Chiefs of India. [Might not the publication of this message have been delayed till after the debate in the House of Commons to-night ?]

OUR London correspondent, telegraphing on Saturday, says that Earl (known in history as Lord John) Russell "still lingers." The noble Earl has nearly completed his 86th year, so that his recovery from a serious illness can hardly be looked for.

THE prosecutions in connection with the recent License Tax riots at Surat seem, like the Dragon's teeth, to be springing up one after another where least expected. In the first case, one rioter has been sentenced to be transported for ten years, and five others for seven years each. In another case nineteen more rioters are undergoing their trial before the Sessions Judge of Surat. In a third case, three more have been sentenced by Mr. Lely, the special magistrate, to rigorous imprisonment for two years and two months each and to pay a fine of Rs. 30 each, or in default to suffer further imprisonment for seven months each. In the fourth case, ten more rioters were charged before the same magistrate, and were, for want of satisfactory evidence, discharged on the 16th inst., his Worship remarking—"I do not consider that the evidence against any one of these ten prisoners is sufficiently unimpeachable to justify a conviction, and I therefore discharge all under section 195 of the Criminal Procedure Code." The hearing of a fifth, and somewhat peculiar case—as will be seen from the report of our special correspondent at Surat—commenced before Mr. Lely on Saturday last. In this case, the editors of two native newspapers published at Surat, a vakil, and three other persons in well-to-do circumstances, were substantially charged with inciting others of their fellow-citizens to commit the acts of lawlessness for which some of them have already been punished. They are charged, under sections 109 and 511 of the Penal Code, with abetting or attempting to abet the commission of the offences of being members of an unlawful assembly, rioting armed with a deadly weapon, assaulting public servants when suppressing a riot, attempt to murder, voluntarily causing grievous hurt, and committing mischief. The evidence for the prosecution went to shew that the accused frequently met at the house of prisoner Goolabdass, induced the shopkeepers to close their shops, and concerted measures to thwart the arrangements of the Collector for levying the License Tax in Surat. Their advice to people generally was to create a breach of the peace, assault Government officials, and even kill one or two, if they hoped to induce Government to abandon the tax. At the rising of the court on Saturday, bail for the accused was again refused. The magistrate said it was an extremely important case, and the offence heinous if the accused were guilty; and he therefore allowed an adjournment to enable the Collector of Surat to secure the services of special counsel to conduct the prosecution.

FROM ADRIANOPLE TO CONSTANTINOPLE.



CHOLERA of a virulent type has broken out in Morar Cantonments, and so urgent has been the call for medical aid that surgeons from other stations have been telegraphed for. Surgeon Hayes, attached to the 22nd Regiment at Allahabad, was sent away at a moment's notice, and accounts from Gwalior show that the severity of the epidemic has not been overrated. Lieutenant-Colonel Hay, commanding the 62nd Regiment, and one of his subalterns, Lieutenant Goding, died on Friday, and the disease has now spread fatally among the men. A cholera camp, we believe, is to be at once established. The *Delhi Gazette*, since to hand, publishes the following letter, from Gwalior, dated the 11th inst:—"We have had a sand-storm here, which was much appreciated by all as a valuable and welcome guest, as it may clear and purify the atmosphere from the direful epidemic disease with which we are at present enveloped. Cholera and small-pox are of a virulent type in this vicinity. Three fatal cases occurred in Morar last night in the persons of two officers and one private of the 62nd Regiment. The names of the two officers are Lieutenant Colonel Graham Hay, Commanding the Regiment, and Lieutenant Arthur Goding. One Battery of Royal Artillery and the 41st Native Infantry are now under canvass a short distance off Morar cantonments. A European soldier at Morar died a few days ago from small-pox, in a most heartrending manner, and if all be true it was a very sad and painful event. It is said that he died raving and beating his head against the wall, when death came to his relief." The *Pioneer* says, that "up to the 15th, out of 36 seizures among Europeans, 34 cases had been fatal, including Colonel Hay and Lieut. Goding, of the 62nd, who died within 24 hours of each other. In the native force, including camp followers, there had been 25 fatal cases out of 52 attacks. Cholera camps had been formed, chiefly for the artillery. General Rothney's exertions in this trying state of things are said to be unceasing, and Scindiah has sent a most feeling letter begging to be allowed to give any assistance in his power."

THE *Pioneer*.—A resolution, which defines the scope and character of the work before the Famine Commission, is about to be published. The justice of our remarks upon the Secretary of State's despatch on the subject when it first appeared, are amply demonstrated by certain clauses of this resolution arguing, in a descreet way, against the cramping influences of the orders received from home. Thus, we are told in one place that it will not be possible for the Commission, when inquiring into the best system of famine administration to abstain altogether from examining and criticising those systems which have been in force in different provinces during the recent and previous famines. Again, the Commission, though warned in the despatch against attempting any general inquiry into the merits or demerits of the Madras ryotwari system, is licensed to investigate several points especially designed to illustrate its working. As regards the method of prosecuting the various inquiries, the Commission is allowed a wide discretion whether to examine witnesses orally or otherwise, or to delegate one or more of their members to undertake inquiries in particular localities.

SOME of the men in the 4th Battalion, 60th Rifles, enlisted under the Enlistment Act of 1870, have, it is said, shown some dissatisfaction at the order lately published respecting their having to serve more than six years with their regiments. The regiment would be minus about 250 men, if those enlisted for six years were allowed to go home in the autumn.

A GREAT sensation has been created at Mymensing on account of several cases of rioting with deadly weapons between a European *ijaradar* on one side and a Native Zemindar on the other. Mr. Montriou, barrister of Calcutta, is engaged in connection with these cases on behalf of the Zemindar, whose personal attendance in the Magistrate's Court has been demanded.

THE *Englishman*'s Bombay correspondent says:—"The past fortnight's effort in despatching the Expedition will go further towards securing what is understood to be the goal of Sir Richard Temple's ambition, than ten years of quiet steady work at Indian administration. Why is this? Because in expediting the despatch of these troops during the Parliamentary recess, he has rendered infinite obligation to a great party which, whether in or out of office, will always be powerful enough to secure him anything he likes to ask for. It may be said that the Governor of Bombay has in this instance rendered a substantial imperial service; and it is not for me to dispute this. But merely glancing at the contrast between the certainty and value of public rewards for political and party service, and the often grudging, always tardy, acknowledgment of labours spent and substantial services rendered) to the people and future of this (by England undervalued, but magnificent, dependency."

ANOTHER brutal murder has been committed at one of the outlying stations. Information has just been sent in from Shubkuddur, of a sepoy of the 14th Sikhs having been murdered outside the fort walls, and his body thrown into a tank close by. It appears that the man was given to gambling, and when he left the fort he had over Rs. 100 in his possession, part of which he had won that day; so it is supposed that some of our unfriendly neighbours, the Mohmunds, who always have an eye to business, knowing of his good luck, were tempted to take the poor fellow's life.

CAPTAIN NISBET, Deputy Commissioner of Simla, is, it is reported, to be transferred to another station. His high-handed proceedings have made him very unpopular at Simla.

THE Simla correspondent of the *Pioneer* says that Sir Lewis Pelly positively returns, and they are sorely puzzled to dispose of him. "He hates Rajpootna,—a Christian sentiment which Rajpootna returned ten-fold, in kind—and will not therefore resume his thorny throne at Ajmere. But I doubt if Government will take heart of grace and remind Sir Lewis in meaning language that he might claim his colonel's allowances in November next."

THE *Madras Times*:—"The Grand Arsenal, Fort Saint George, presents daily a scene of great commotion. Never before, we believe, has there been such excitement and turmoil within its walls. The various departments are all busily engaged in the manufacture and collection of war-material, and have been so for some time past. Large orders are daily arriving, and, as each order is completed, the articles are packed up and laid aside pending further instructions regarding their dispatch. Everything that the Arsenal can supply for modern warfare is being got ready, not only for the defences of this city, and the other defences that it has been considered expedient to take in hand at various stations on this as well as the Western Coast—but also such war articles as may be required in case a second expedition should be ordered from India."

THE *Civil and Military Gazette* says:—"We have been favoured with telegraphic news from Bushire, whereby we regret to learn that for the past six days swarms of young locusts have been eating every green thing in field, tree, and garden, in the Bushire peninsula. These pests were bred close to the summer house of the British residency at Subsabad, and are not able to fly. They have not left a green leaf. It is to be hoped means will be taken to destroy them. Fortunately the crops had all been gathered before they appeared."

THE *Indian Daily News* says, that "one more or less unpleasant subject for reflection in connection with the trial of the Rajah of Pooree is the absurdity of making men sit as assessors, and taking no heed to what they say. This happens not infrequently; and over and above its inherent absurdity is really becoming a scandal. In this case, for instance, two respectable Hindus gave a verdict directly against the evidence, were promptly, and in our opinion very properly, overruled by the other consulting member, the Judge, and—collapsed, we suppose. But what on earth is the use of keeping up such a transparently useless sham?"

THE *Lucknow Witness* deplores the fact that in Northern India the Christian converts sometimes revert to Mahomedanism.

THE *Englishman*—The view taken in Mr. A. H. Browne's article, "Islam as it is," in the last number of the *Calcutta Review*, of the political tendencies of Muhammadanism, is instructive if somewhat one sided. It is a common opinion that the political rôle of Islam must needs be that of hostility, latent or active, to Christendom, because certain passages in the Koran inculcate hatred towards, and, in some cases, war against, unbelievers. Mr. Browne insists that we must not judge Muhammadanism by the strict letter of the Koran, but by the practical interpretation put upon it by Muhammadans. He points out that the Bible itself contains similar precepts, and asks whether it would not be considered absurd for a Muhammadan to take the Bible or New Testament, and framing from it a code of laws, political and social, according to his own conception of its meaning declare that code to be the one by which all Christians were guided, and that any estimate of Christianity or Christians not founded on it must be incorrect. In other words, two factors go to make up the Muhammadanism with which the world at any time has to reckon as a social and political agency,—the body of authoritative precepts which are the recognised criteria of Muhammadan morality, social and political; and the circumstances, temper and intellectual bias which any given body of professing Muhammadans may bring to bear on those precepts. The same may, of course, be said of all systems whatever. The conduct of their adherents is not rigidly determined by the standard which they recognise in theory, but only modified by it, more or less profoundly, in combination with a multitude of other conditions. While we may point out, however, is that in estimating the relation in which Islam stands to the rest of mankind, or any portion of them, we cannot safely ignore the standard which it accepts as its criterion of right conduct. For what we have to estimate is not merely the actual facts of the present, or even the imminent facts of the immediate future, but all the prospective probabilities of the case. Muhammadan conduct may never rigidly conform to the Muhammadan standard; but that standard is the one constant, and a very potent constant, amid many variables. A chemical compound, which explodes only in the presence of a certain combination of conditions, cannot be regarded or treated as a harmless compound, merely because that combination does not exist at any particular moment. The degree in which it must be regarded as dangerous will depend on the probability of such a combination occurring. A sect whose moral code sanctioned murder on slight provocation, would be potentially none the less dangerous because in certain present circumstances its members were so much influenced by the fear of detection and punishment, that they abstained from availing themselves of the sanction. We could not punish them for merely recognising such a standard, but we should certainly be justified in regarding them as in some sense enemies of mankind, in subjecting them to exceptional restrictions, and even in prohibiting the propagation of their doctrines. If Islam inculcates hostility to unbelievers, then Muhammadans must be regarded as, potentially at least, a danger to unbelievers. The way in which unbelievers may treat them will be largely determined by the experience of their actual conduct and their knowledge of the other conditions influencing that conduct; but the estimate unbelievers may form of Muhammadanism will embrace a much more extended view. There may be good reasons for forming a favourable prognosis of the future developments of Muhammadan conduct, and, no doubt, the actual tendency is towards greater liberality and enlightenment. But it would be premature to regard even the most truculent precepts of the Koran either as obsolete, or as permanently inoperative.

MIXED marriages have been discussed lately in New Zealand, as well as in Madras. Father Henneberry, a Catholic Missionary, has since his arrival at the West Coast of the Colony denounced marriages between Catholics and Protestants as adultery, the result being separation of families, and much domestic misery. He was strongly criticized by the *Kumara Times*, and retorted by a personal attack on the editor, who has commenced an action for £1,000 damages. Most Catholics have withdrawn their subscription from the *Times*, and the Protestants have doubled and trebled their subscriptions. Father Henneberry denies having called mixed marriages adulterous, but states that the contracting parties are guilty of mortal sin in disobeying the ordinances of the church.

A TORPEDO experiment at Sydney nearly resulted in great loss of life. A torpedo exploded alongside the steamer whence the experiments were being made. The escape of the vessel from being smashed to pieces was a narrow one. As it was, the explosion deluged her with a great volume of water.

THE S. S. CHINA.

THE s.s. China still lies at her moorings opposite the Mazagon Bunder, and near the fishing stakes. The process of pumping out the water and unloading her cargo has been vigorously proceeded with, and she now draws barely 20ft. afs and about 18ft. forward. At this rate, she will soon be able to be taken into dock to overhauling and repair.

BOMBAY.

WE regret to learn from Hyderabad that Mr. Lyons, advertising and general agent to Wilson's Circus, died a few days ago at Secunderabad.

A CORRESPONDENT writes to us—"Will you kindly let me protest against the nuisance of milk being, to a great extent, adulterated before being sold in all parts of Bombay. Each seer of what is sold as milk is nearly three-fourths part of water, and the seller tries to persuade one that it is good and pure. You are then charged at the rate of two annas per seer for buffaloe's and three annas for cow's milk. After it has been once bought and tested you are baffled on finding it adulterated, for, if it be put into your own vessel, the milkman refuses to take it back, because, he says, it is polluted. Cannot the police interfere in such cases, and hand these people up to the Magistrate? as they ought no doubt to be punished for the adulteration of an article of food."

SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS.—The following cases were prosecuted by the agents of this Society last week:—Horses, lame 5, emaciated 2. Ponies, 4 overladen. Bullocks, sore-necked 13, lame 4, emaciated 5. The total amount of fines inflicted was Rs. 124.

REFRACTORY SHAMEN.—Joseph Osborne, of the ship Victoria Cross, and Edwin Mortimer, of the s.s. Venetia, were both sentenced on Saturday by Mr. W. Webb, the former to two weeks' hard labour in the House of Correction, and the latter to two days' hard labour in the same jail, on their being convicted of wilful disobedience in refusing to do duty on board their respective ships.

CHEATING.—A Hindoo merchant, named Goverdundas Hurridas, appeared on Saturday before Mr. W. Webb, and obtained a warrant for the arrest of a man named Ruttonsey, charging him with cheating in respect of eighty-two bales of cotton, the property of the complainant. The accused is alleged to have obtained the said bales of cotton from the G. I. P. Railway Company on a false representation.

FATAL FALL INTO THE HOLD OF A SHIP.—A Coroner's inquest was held on Saturday at the Goculdas Tejpal Hospital, on view of the body of a Hindoo. On the inquest deceased proceeded on board the steamship Calcutta to see some friends off for Kurrachee, and whilst there he lost his balance and fell through the main hatchway into the hold of that vessel. He was picked up insensible and conveyed to the hospital where he expired from the effects of the injuries he had sustained. The following verdict was recorded: "That the death of the deceased was caused by fracture of the spine, the result of an accidental fall into the hold of a ship."

A NEW ICE COMPANY.

At the present moment, when all Bombay is suffering from the want of one of its most precious commodities it is gratifying to see the announcement of a Prospectus of an Ice Manufacturing Company, which is launched under the directorship of some very strong local names. This Prospectus will be found in another column, and the information it contains will be read with unusual interest at the present time. The patent machinery that the Company propose to use for the manufacture of ice, will render Bombay independent of all importations of that article, and, besides, we are told that ice thus made is colder than any imported ice can be, and at Manchester it has driven the Norwegian article entirely out of the market. At Calcutta and Madras, this patent machinery for making ice has already been set up, where, as in Europe, it is worked with the most satisfactory results. The Prospectus of the Bombay Company gives already all the information that intending shareholders could desire, and we look with confidence to the Company soon becoming one of the institutions of this city.

THE BOMBAY HEMP AND JUTE MILLS CO., LIMITED.

AN extraordinary general meeting of the shareholders of the Bombay Hemp and Jute Mills Company, Limited, was held on Saturday last at the office of the Company, for the purpose of considering matters referred to in a requisition sent to the directors of the Company, signed by about fifty shareholders, and passing special resolutions thereon. There were present more than forty shareholders.

Mr. Sorabjee Rustomjee Bunshah, the Secretary of the Company, stated that the directors wished that the shareholders should appoint one of their own number to act as chairman, as the subjects to be considered by the meeting came from them in the form of a requisition; he therefore begged that they would elect one of the members present to act as chairman. Mr. Hormusjee Ardashir Suntoke was accordingly voted to the chair. Mr. Sorabjee R. Bunshah then read the advertisement convening the meeting. Mr. Thakurdass Atmaram, solicitor to the Company, stated that before the business of the meeting was proceeded with, he would mention that as the requisitionists had failed to specify in the requisition the particular special resolutions which they intended to propose at that day's meeting, as required by section 51 of the Indian Companies' Act, and that these resolutions not having been previously advertised with the notice calling the meeting, it was his opinion that there was no course left but that the chairman should dissolve the meeting. As Mr. Remington, solicitor, was present on behalf of Mr. Ahmedbhoy Hubibbhoy and several other shareholders did not object to the proposition of Mr. Thakurdass, the chairman declared the meeting to be dissolved.

THE VOLUNTEER ENTERTAINMENT AT THE VICTORIA GARDENS.

THE promoters of the Al-fresco entertainment at the Victoria Gardens on Saturday have cause to congratulate themselves on its success, and the Band Fund of the Volunteer Corps should be considerably augmented by the financial result. There was a large crowd —everybody who is anybody in Bombay appeared to be there, along with his female appendages; and all present seemed to enjoy themselves thoroughly, from the grave and learned High Court Judge who walked solemnly about with an interested smile on his face, quietly studying the phases of the ever-changing crowd, to the lively youth, boiling over with fun and mischief, who was to be seen here, there, and everywhere during the evening finding amusement after his own particular fashion, which towards the close took the form of inserting bits of ice between the collar and neck of any of his acquaintances whom he could manage to take unawares. This prank aroused some indignation and a little show of retaliation, but it was taken good humouredly, and there was not the faintest shadow of a 'row' to mar the pleasure of the entertainment. The fun commenced very shortly after nine o'clock, at which time there was a crowd gathered together a very large number of people, and the gates were beseiged by fresh comers. It was a cool, pleasant evening, and the gardens were beautifully illuminated by the moon, which was nearly full. There was no lack of amusement. There were two or three bands, including the band of the Volunteer Corps, which appeared in public on this occasion for the second time only since its formation; there was a nice platform for dancers; there was a neat stage erected for theatrical performances; and there were several refreshment buffets, where the (at present) rare luxury of an iced "peg" was obtainable. The caterers, Messrs. Bouvialle and Essel, had procured a supply of ice from Madras with great difficulty, and by paying for it considerably more than the ordinary price. The only chairs in the garden were in what may be called the theatre (the open space in front of the temporary stage), where a large number of the visitors assembled to witness the amateur performances. The latest mixed the dancing platform, which was in another part of the garden, and the "light fantastic toe" was kept tripping all the evening, and long after the lights on the stage had been extinguished and the actors had washed their faces, discarded their wigs, and assumed their wonted attire. The only cessation in the dancing was when the fireworks were let off, which they were with much hissing noise and with very pretty effect. There were sky rockets, Roman candles, catherine wheels, crackers, &c., &c., in abundance, and there was a fiery scroll "Long live Col. Sexton," the appearance of which was greeted with three hearty cheers for the popular Commandant of the Volunteers. After the fireworks the band played the National Anthem, which we presume was intended to signal the close of the entertainment. But if so, it by no means did what it was supposed to do, for the dancers returned to their platform, and continued to dance away with unabated enthusiasm for some time afterwards. But at last the exodus forthwith began, and the Gardens were soon commenced and ended, and the Gardens were soon deserted by all except the policeman, and the barmen who remained to guard the remnant of their wares.

VOLUNTEER SHOOTING.

VOLUNTEERS v. 66TH REGIMENT.

A MATCH between ten N. C. Officers of the 66th Regiment and ten N. C. Officers of the Bombay Volunteer Rifles was shot off on Saturday morning at Colaba. There was a large attendance to witness the shooting, amongst those present being Col. Sexton, Major Maxwell, Lt and Adjutant Dunne, Captain Hore, Lt. Wyer, Lt. Thorpe, Lt. Mayhew, and other officers. The terms of the match were,—ten shots each at 500 and 700 yards, one sighting shot at each distance. At 500 yards, the soldiers got the best of it, and at the close of the shooting at that range they were 15 points ahead. The difference was so slight that a close contest was expected at 700 y

INSURE YOUR HEALTH
BY TAKING
HOCKING'S
IMPROVED SEIDLITZ POWDER.

IT differs from Seidlitz Powders usually sold in having all the ingredients in one bottle, is quite tasteless and may be taken by persons of all ages as a *Cooling Beverage, Mild Aperient, or Brisk Purgative*, according to dose. Its extensive use during nearly half a century proves its valuable qualities as a Purgative Saline, and the fact that the powder retains its qualities for any number of years renders it a most reliable and efficient Domestic Medicine. It will be found invaluable to Families, Travellers or Emigrants, as a preventive or remedy in all cases of Sickness, Headache, Bilious Attacks, Fevers, and the other ordinary ailments of life. Manufactured only by Hocking Wilson and Co., 39, Dunce St., Manchester Square, London.

WELL WORTHY OF NOTICE AS A CERTAIN CURE.

For Bilious and Liver Complaints, Indigestion, Wind, Spasms, Foul Breath, Nervous Depression, Irritability, Lassitude, Loss of Appetite, Dyspepsia, Heartburn, Sour Eructations, Lowness of Spirits with sensation of fullness at the pit of the Stomach, Giddiness, Dizziness of the Eyes, &c.,
DR. SCOTT'S BILIOUS AND LIVER PILLS STAND UNRIVALLED.

As a General Family Aperient Medicine they have no equal, being mild in their operation, and grateful to the Stomach, they give a healthy tone and vigour to the different secretions, causing the necessary organs of the Stomach and Liver to resume their activity, thus restoring the appetite, promoting digestion, and strengthening the whole system.
They can be taken at any time without restraint from business or pleasure, hence they are a most valuable domestic Medicine. Heads of households should always have a box of these Pills by them, to resort to on any slight occasion of ailing on the part of those under their charge, as by paying attention to the regular action of the Stomach, Liver and Bowels, many a severe illness is avoided or mitigated. They will be found in slight cases by a single dose to restore health to the body with a happy frame of mind.
Prepared only by W. Lambert, 1A, Vere Street, London, W., England. In Bottles ONLY, 1s. 1½d. and 2s. 9d. Sold by all Chemists.
IMPORTANT CAUTION.—Be sure to ask for "DR. SCOTT'S Bilious and Liver Pills," in a green bottle, wrapped in green paper, and having the name and address,
WILLIAM LAMBERT,
8, King William Street, Charing Cross,
Engraved on the Government Stamp. Do not, therefore, purchase without seeing the Government Stamp over the cork of the bottle.

OXYGEN IS LIFE.

ALTHOUGH the modern Materia Medica includes many valuable remedies for human afflictions, it is a matter of certainty that in all cases where the animal vitality is failing, Phosphorus is decidedly superior to every other remedy at present known. It will work effects such as nothing else will produce, and it possesses the great advantage of not causing, when its use is relinquished, the slightest reaction or depression.
The question naturally presents itself, "Why is so valuable an element little regarded and so seldom prescribed?" The only answer which can be given is:—That a certain difficulty has been found in so preparing it that its action may be kept under perfect control. Hitherto it has been used in almond and olive oils, in sulphuric ether, in rectified alcohol, in chloroform, and in several other substances; but however valuable it has been found, all the hitherto known methods of its preparation, certain irregular results have been experienced, which have led physicians to neglect it for general purposes, and to employ it only in extreme cases, and after every other remedy has failed. But a chemical process has now been discovered, by which its invaluable action on the human system may be realised without any of those drawbacks which previous modes of administration have invariably produced.
☞ CAUTION.—PHOSPHORUS is sometimes sold in the form of Pills & Lozenges; it should be generally known that every form where *solid particles* of phosphorus are in combination is dangerous. It is therefore necessary that the public should be cautioned against the use of any preparation of Phosphorus not perfectly soluble in water.
Protected by Royal Letters Patent,
Dated October 11th, 1869.

UNDER DISTINGUISHED PATRONAGE.
DR. BRIGHT'S
PHOSPHODYNE.
(OZONIC OXYGEN)
The New Curative Agent, and only Reliable Remedy for Nervous and Liver Complaints.

MULTITUDES OF PEOPLE are hopelessly suffering from Debility, Nervous and Liver Complaints, Depression of Spirits, Hypochondria, Timidity, Indigestion, Failure of Hearing, Sight, and Memory, Lassitude, Want of Power, &c., whose cases admit of a permanent cure by the new remedy PHOSPHODYNE (Ozonic Oxygen), which at once allays all irritation and excitement, imparts new energy and life to the enfeebled constitution, and rapidly cures every stage of these hitherto incurable and distressing maladies.

DR. BRIGHT'S PHOSPHODYNE
is sold only in CASES at 10s. 6d. by all Chemists and Patent Medicine Vendors throughout the Globe.

Full Direction for use in the English, French, German, Italian Dutch, Spanish, Portuguese, Russian, Danish, Turkish Persian, Hindostani, Madrassee, Bengalee, Chinese and Japanese Languages, accompany each case.

☞ CAUTION.—The large and increasing demand for Dr. Bright's Phosphodyne has led to several imitations under similar names; purchasers of this medicine should therefore be careful to observe that the words "Dr. Bright's Phosphodyne" are blown in the bottle, and that the directions for use are printed in all the languages as above, without which none can possibly be genuine. Every Case bears the Trade Mark and Signature of Patentee.
☞ Important Caution.—Beware of Piracy and a Spurious Imitation.
